### **To Whom it May Concern**

Tamil Nadu Cooperative Milk Producers' Federation (TCMPF) is entrusted with providing Veterinary services to 17 district milk unions spread over entire state. TCMPF provides services to more than 16 lakh animals owned by approximately 4.6 lakh farmers under Co operative ambit.

In order to implement farmer, cow and service provider traceability TCMPF has purchased the data management services from M/s Vetware Private Limited, office address: 1403, Universal Garden, Amrutnagar, Jogeshwari, Mumbai 400 102. The first pilot order was for 100,000 cows to be registered on the platform.

In compliance to this order, Vetware has provided following components and modules:

- **Herdman-Mobivet** the cell phone App to be used by the service providers and individual dairy farmers
- **Herdman-server / desktop software** – For our senior staff to generate reports and data analysis
- **Dashboard** to monitor services and traceability / tracking
- Integration with SAP to port data from and to Herdman
- **SMS / notification module** (in regional language) for sending daily action to the Vets.
- **Cloud Server Space**

Currently, in the software platform 95,000 cows owned by around 37,000 farmers have been registered for monitoring breeding, health and other services. The system is logged by more than 1000 users.

This is also to certify that the system has been working since last two years (including the pilot period) and we are satisfied with the software systems provided by Vetware Private Limited.

We have held one round of discussion to deploy the software to cover all the cows under the jurisdiction of services with some customization to suit to our needs.
